PROFESSIONAL SUMMARY

Mathematics & Computer Science graduate currently working as a Data Analyst and Technical Administrator at UMMO Technologies. Skilled in data analytics, software development, database management, and cybersecurity fundamentals. Proven track record in mathematical modeling, machine learning, and system administration. Driven to use data insights and secure technology solutions to solve complex business and technical challenges.

TECHNICAL SKILLS

Programming: Python, Java, C++, JavaScript, SQL

Data Analytics: Pandas, Scikit-learn, Power BI, Data Visualization

Cybersecurity: Security Principles, Ethical Hacking Fundamentals, Vulnerability Assessment, Threat Analysis, Risk Management

Networking: TCP/IP, VLANs, RIP, OSPF, DHCP, DNS, Cisco Packet Tracer

Web Development: HTML, CSS, JavaScript, Django, Flask

Tools: Git, GitHub, MySQL, Microsoft Office Suite, Trello, L^AT_EX

CORE COMPETENCIES

Problem Solving • Time Management • Communication • Attention to Detail • Teamwork • Adaptability • Leadership
• Technical Documentation • Customer Service

EDUCATION

University of Eswatini, Matsapha, Eswatini

2020–2025

Bachelor of Science in Mathematics and Computer Science

CERTIFICATIONS

- CompTIA Security+ (SY0-601), Alison (2026)
- CompTIA A+ Core 1 & Core 2 Fundamentals, Alison (2026)
- Business Analysis & Process Management, Coursera (2026)
- Certified Ethical Hacker (CEH) Units 1 & 2, Pearson (2025)
- Introduction to Data Science, Alison
- Data Science: Working with Data, Alison

WORK EXPERIENCE

Data Capturer, Data Analyst & Technical Administrator

July 2026 – September 2026

UMMO Technologies, Eswatini

- Perform accurate data capture and system maintenance to support administrative and operational workflows.
- Analyze business datasets to extract key insights, generate routine reports, and support data-driven decision-making.
- Manage task workflows and project tracking using **Trello** to ensure timely execution across administrative tasks.
- Provide technical administration, managing system user accounts, and maintaining operational uptime.

PROJECTS

Dynamics of Victim-Criminal Interactions in a Cyber-network

2024–2025

- Developed SIR-based mathematical models to analyze cybercrime dynamics and victim-criminal interactions.
- Applied Python and machine learning techniques to improve cyber-risk prediction and model evaluation.

THEE DETERGENT E-Commerce Website

2026

- Developed a responsive e-commerce website using HTML, CSS, and JavaScript.
- Implemented authentication, shopping cart functionality, and product management features.

Student Record Management System

2025

- Designed and implemented a database-driven student management system.
- Developed modules for student registration, record management, and reporting.

ADDITIONAL INFORMATION

- Valid Light Motor Vehicle Driver's License
- Languages: English (Fluent), Siswati (Native)
